MOTOROLA SOLUTIONS

SSPS Smart Public Safety Solutions

WHAT IS LONG TERM EVOLUTION?

4G mobile broadband technology

Developed by mobile telephony industry (3GPP)

Enables multimedia applications (data, video and voice)

Chosen as the technology deployed in PSST (Public Safety Spectrum Trust) for private public safety use in North America

Economies of scale from commercial carrier deployments

High uplink (~25 Mbps) and downlink (~55 Mbps) throughputs per sector (10 MHz)

Coverage ranges from 2 – 80 sq. miles / 5 – 200 sq Km (dependent on throughput, antenna height and terrain)

MOTOROLA PUBLIC SAFETY

A STANDARDS-BASED APPROACH

ERICSSON LEADERSHIP

LTE standards leading contributor

Leading provider of LTE networks

Leading LTE device certification lab

SUPERIOR PERFORMANCE

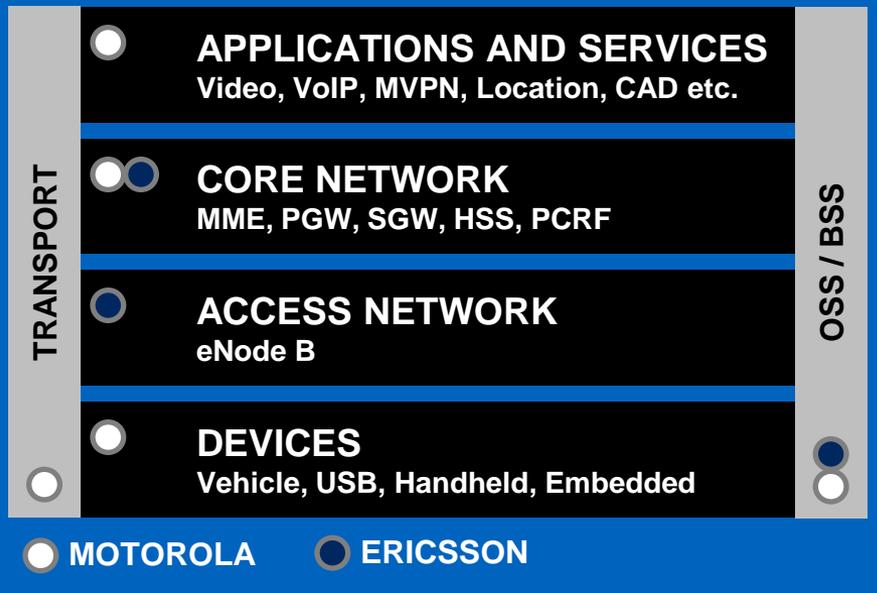

Network reliability and stability

Uplink and downlink data rates

End to end latency

DEPLOYMENT EXPERTS

MOTOROLA LTE STANDARDS-COMPLIANT ARCHITECTURE

135

YEARS SERVING THE
TELECOM MARKET

1000

NETWORKS
OPERATING IN 180
COUNTRIES

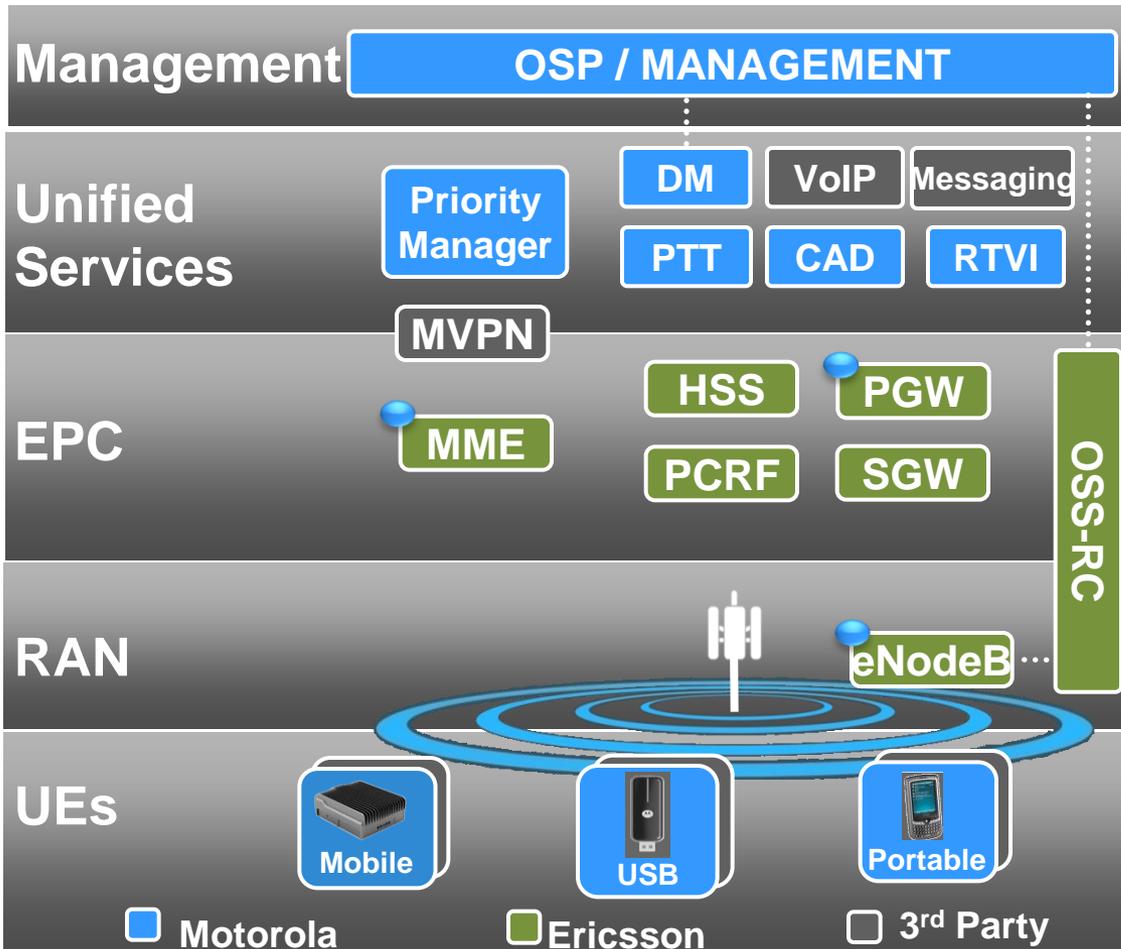

2B

SUBSCRIBERS
SUPPORTED ON
ERICSSON NETWORKS

750M

SUBSCRIBERS
MANAGED BY
ERICSSON NETWORKS

PS LTE ARCHITECTURE

Management/Unified Services

- PTT- Push To Talk
- RTVI- Real Time Video
- CAD – Computer Aided Dispatch

Virtualised Evolved Packet Core (EPC) containing:

- MME Mobility Management Entity
- HSS – Home Subscriber Server
- PGW – Packet Gateway
- SGW – Serving Gateway
- Etc...

Radio Access Network - RAN

- 10MHz 3GPP Band 28
- 2x MIMO

UEs - User Device

- Portable
- Vichular
- 3° Party Device

PUBLIC SAFETY vs CARRIER NETWORK

	CARRIER MODEL	PUBLIC SAFETY MODEL
BUSINESS OBJECTIVE	Revenue growth	Protect life and property
CAPACITY DESIGN	For “typical day” (PREDICTABLE)	For “worst day” (UNPREDICTABLE)
COVERAGE DESIGN	Based on population density (PREDICTABLE)	Based on life and property that need protection (UNPREDICTABLE)
COMMUNICATIONS DESIGN	One-to-one communications	One-to-many communications
BROADBAND DATA NEED	Internet access to centralized internet connections (HEAVY DOWNLOAD)	Traffic to agency enterprise network...not thru Internet (HEAVY UPLOAD & DOWNLOAD APPS)
SUBSCRIBER DATA INFO	Owned by Carrier	Owned by Agencies
SERVICE PRIORITY DIFFERENTIATION	Minimal differentiation - Subscription and application level	Significant differentiation - Role and incident level (VERY DYNAMIC)

BUILT FOR PUBLIC SAFETY

PUBLIC SAFETY NEEDS MORE THAN STANDARDS

**QoS &
Prioritization**

**Prioritized services for the
most critical incidents**

**Dynamically prioritized data
flows and communications**

Security

**Enhanced security and data
integrity**

Mobile VPN security

Applications

**Control room applications
designed for LTE**

**CAD, voice and bandwidth
optimized real-time video**

LMR Interop

**P25 and Tetra two-way radio
interactions**

**Push-to-talk coordination
across LTE, P25 and Tetra**

Devices

**Public safety designed user
devices**

**Hardened and ruggedized
user devices**

SECURITY

LTE STANDARD COMPLIANT & ENHANCED

Over The Air LTE and LTE system encryption – using 3GPP standard defined security

Enhanced end to end application encryption whilst maintaining QoS

Firewall security and Intrusion Detection Systems (IDS) are deployed at both core and application networks

APPLICATIONS

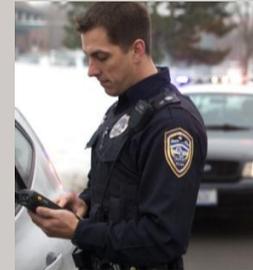

APPLICATIONS OPTIMISED FOR LTE

RTVI: Real Time Video Intelligence

Provides the capability to transmit and receive high quality, low latency video content dynamically optimized to improve the ability to monitor, prepare, and respond to incidents

CAD (Computer Aided Dispatch), license plate search, finger print identification, report writing data applications enable integrated command & control and workforce mobility

Data Applications

Push-To-Talk & VoIP

PTT voice to supplement mission critical voice and provide interoperability to current LMR (Tetra, Astro) networks

LMR INTEROPERABILITY

UNIFIED NETWORK SERVICES

LTE to LMR (Land Mobile Radio) networks including Tetra and Astro P25, Push-To-Talk individual voice calls and group calls supported

GPS information from Tetra and LTE devices are combined enabling the locations of both types of devices to be shown on a single map client

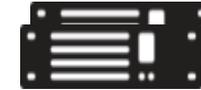

SMS messaging between LTE and LMR clients

Presence, status and alert information shared from both LMR and LTE devices

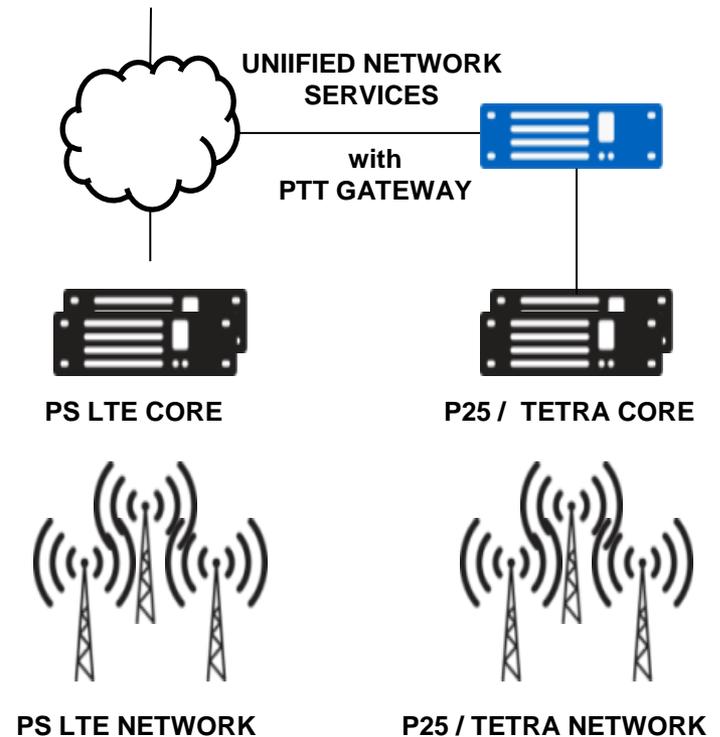

LTE APPLICATIONS & SERVICES

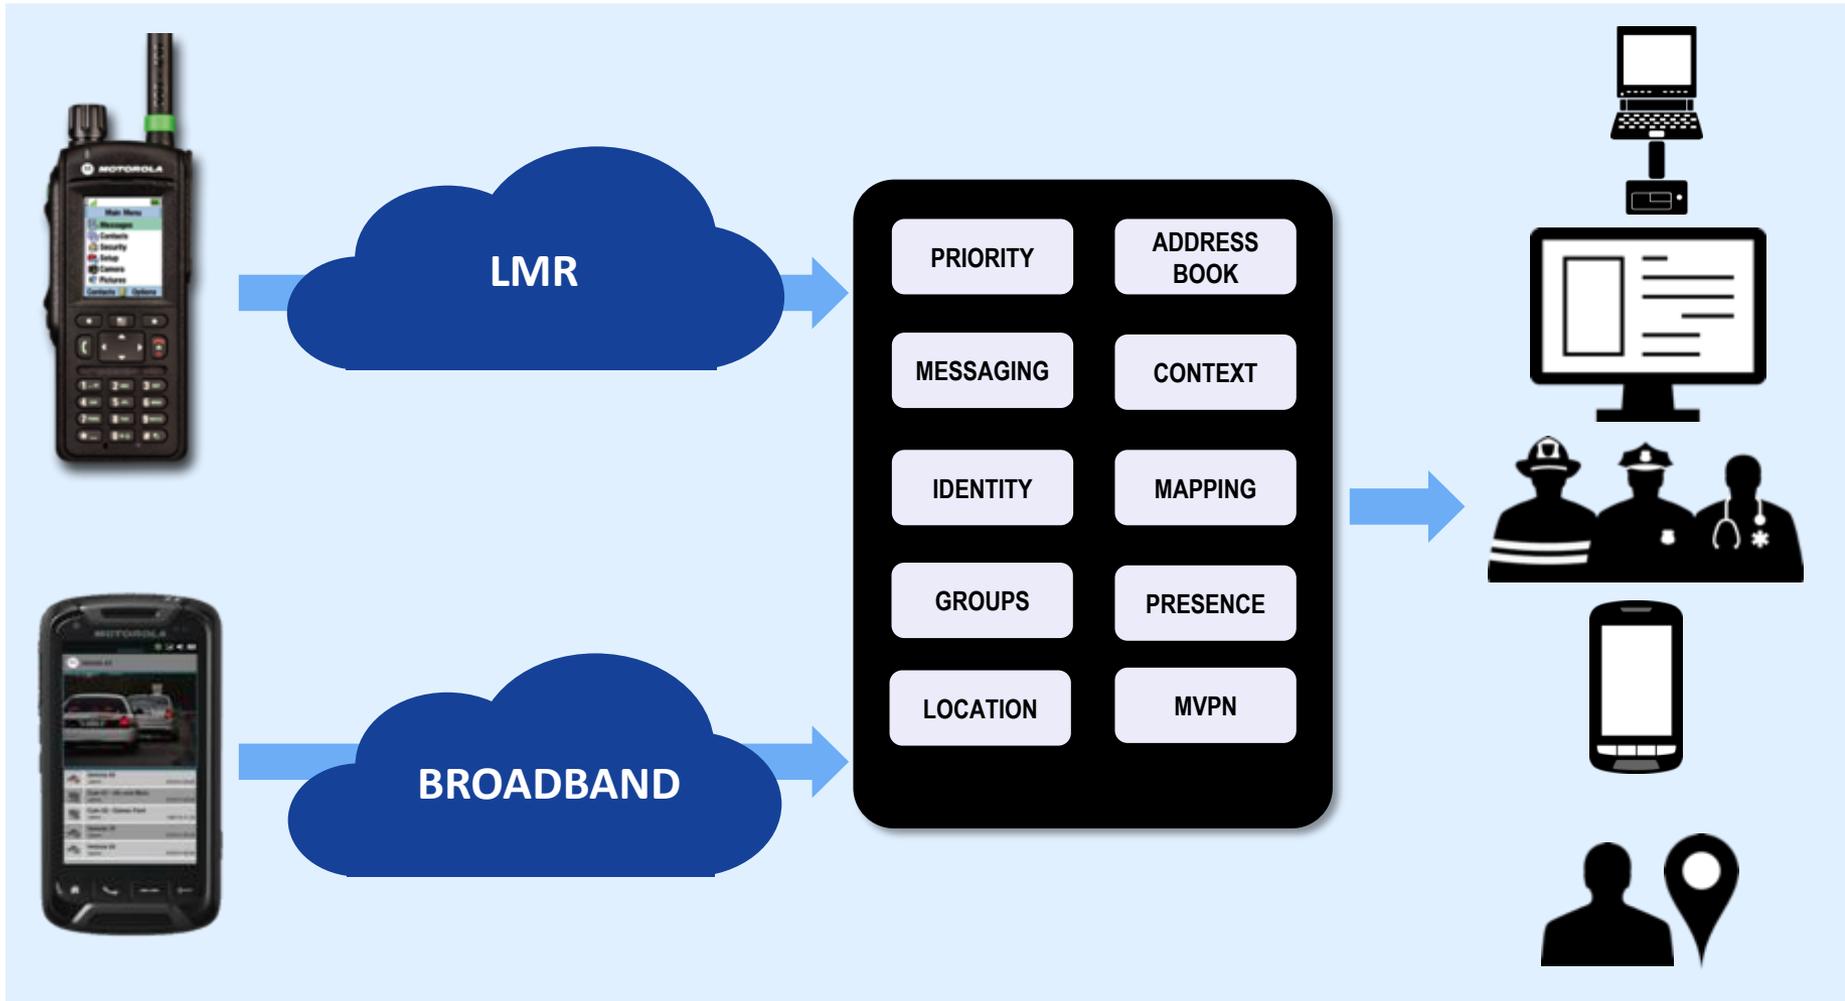

MVPN

APPLICATIONS

MOTOROLA MIDDLEWARE

Scalable infrastructure

BODY WORN / MAN PACK

AERIAL / DRONE / BALLOON

IN-VEHICLE

Ultra Portable

Tactical Case

On Wheels (COW, SOW)

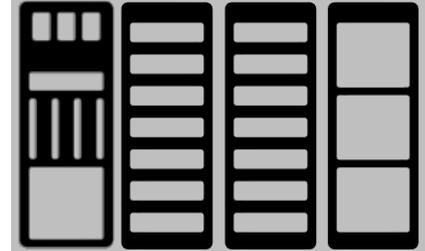

IN-VEHICLE

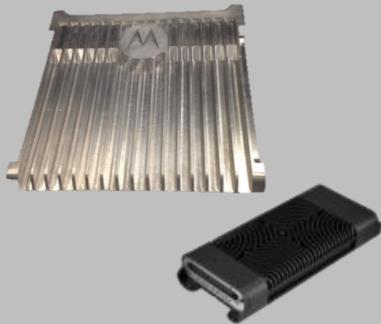

Deployable

Available now

Q1 2017

Available now

LEX L10 International

Key Features

- Motorola's leading Public Safety optimized user interface (MHx)
- Best in class audio & PTT experience
 - Dedicated large PTT button
 - Dual 1W front facing speakers
 - 3 microphone noise cancellation
- Best in class security
 - Available CRYPTR Micro, FIPS 140-2 Level 3
 - Secure boot & hardened Android
- MPP Secure pairing for collaboration features with Motorola LMR handhelds

Key Specifications

- Battery life – 10 hours (20 hrs with xcap battery)
- IP67 / MIL-810G (4' to concrete)
- Bright 4.7" HD display with glove & water touch
- Wi-Fi, BT, GPS
- Quad core 2.3GHz processor
- 8 LTE bands (3, 4, 5, 7, 20, 26, 28) 5 UMTS bands (1, 2, 4, 5, 8) and Quad band GSM

LEX L10 & TETRA PORTABLES

RADIO REMOTE CONTROL IS AN ADVANCED USER
INTERFACE FOR TETRA & APX RADIOS

Radio Remote
Control App

Bluetooth

- MTP3000 & MTP6000
- Manage radio:
 - Talk Groups
 - Volume

- Activate Emergency
- Monitor radio:
 - Signal Strength
 - Battery Life
- Ideal for
 - Covert operations
 - Surveillance

VEHICLE SUBSCRIBER MODEM

VML 750

RUGGEDIZED VEHICLE MODEM

- MIL-810G
- IP66
- Designed and tested for continuous vehicle use
- Vibration and mechanical shock rated
- Operating Temperature -30° C to +60° C

MULTIPLE RADIO TECHNOLOGIES

- 4G LTE Bands 3, 7, 20, 26, 28
- 3G
- Dual SIM support
- WiFi 802.11 b/g/n – up to 32 users
- Integrated GPS

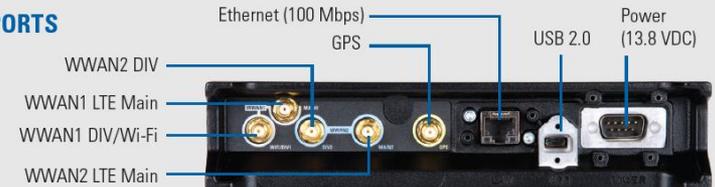

OTHER

- External roof-mounted diversity antennas
- Ethernet 10/100Mbps
- USB 2.0 Interface

- Combined LTE, Wi-Fi & GPS antenna

PORTS

Note: Available Q4 16

Si SERIES FUNCTIONALITY

BLUETOOTH

To serve as a hub for Personal Area Network (PAN) ecosystem

WiFi

OTA programming or uploading content

LTE (Si700)

For streaming hi-res video and fast database lookups

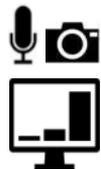

PAN SENSORS

Connections to heart rate monitors, gas sensors, equipment sensors, indoor location

COMMANDCENTRAL VAULT

Digital Evidence Management System supporting Video and Voice Recording

BUILT IN GPS (Si700)

For location, mapping and geo-tagging

VOICE COMMANDS

For easy Talkgroup change or basic commands

APPLICATION SUPPORT

Android Operating System

VOICE RECORDING

For witness statements and note taking

BODY WORN CAMERA

Camera for recording video plus voice and taking still images

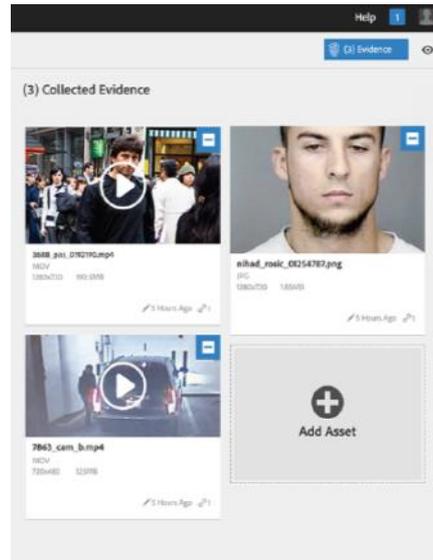

BODY-WORN VIDEO PROGRAM: KEY ELEMENTS

**Camera/Capture
Device**

Accessories

**Content
Management &
Workflow & Storage**

**Policies and
Procedures**

Numerous Considerations Must Be Made In Defining
And Deploying An Effective System For The Long-term

REDEFINING BODY WORN VIDEO PROGRAMS

A COMPLETE, END-TO-END
DIGITAL EVIDENCE MANAGEMENT SOLUTION

**Si Series
Video Speaker
Microphone**

**CommandCentral Vault
Digital Evidence Management
Software**
